Vision and Mission

Vision

We will be recognized as the;

- superior provider of job shop services to the Midwest Region.
- #1 choice provider of coil processing mandrel drum design, construction, and repair services throughout the United States.

These states of achievement will be obtained through organizational commitment to Best Practices management principles, the employment of skilled personnel assembled in an environment that nurtures educational and financial growth, the development of sound business relationships with quality approved suppliers, by being supportive of local community activities and respectful of our environment; while maintaining competitive pricing to our customers and ensuring fair returns to our shareholders.

Mission

To provide customer focused machining, fabricating, and millwright services to the metals producing, processing, and manufacturing industries.
